# Scanning using Image Acquire software on Apple Mac OS
Image Acquire software can be manually installed to synchronize the scanner with the TWAIN-compatible software.
Installing Image Acquire software

1. Insert the software Installation CD into your CD-ROM drive. An 🔘 **Autorun.iso** icon appears on the screen. Double-click on the icon to open the below window.

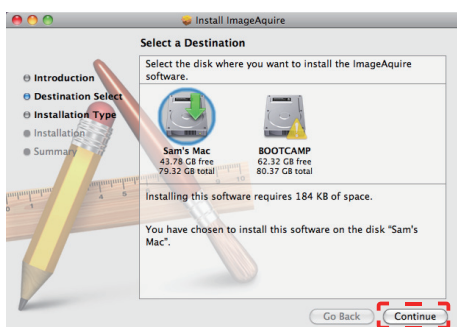

Note: If you can not see the 🔘 **Autorun.iso** icon on the desktop, go to **Finder > Preferences** to enable the display of the item.

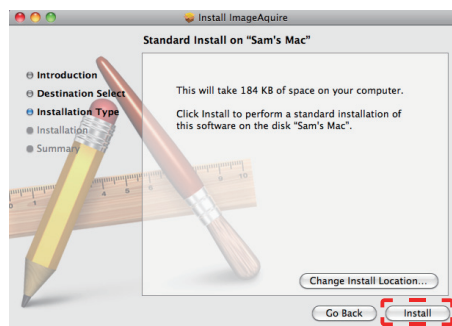

2. Double-click **Image Acquire** folder, and then double-click 📦 **Image Acquire** icon to start the installation wizard. Click <**Continue**>.

3. Select a destination to install the **Image Acquire** (if more hard disks available). Click <**Continue**>.

4. Once the destination has been selected, click <**Install**> button to continue the installation procedure.

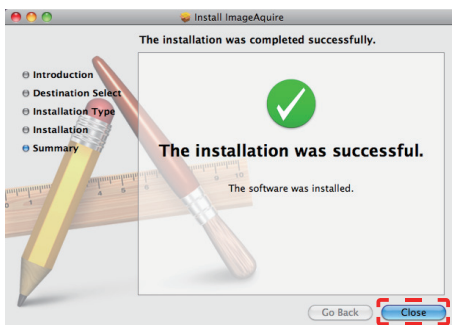

5. Please be patient, the installation procedure will take a while.

Note: A reminder window will pop-up on the screen if you have set a password on your computer. Enter the password and then click <**OK**> to continue the installation procedure. (For the password setting, refer to your Mac's manual.)

6. Click <**Close**> when the installation procedure is complete.

7. The scanner is now ready for use.
Acquiring images

1. To enable the **Image Acquire**, double click the scanner icon from Mac's Applications folder.

**Note:** The scanner icon may vary depends on scanner model.

2. Choose the respective scanner model from the TWAIN Devices menu, and then click the <**Acquire**> button to bring up the TWAIN window.

Select the scanner model

3. Place the photo or document on the scanner.

4. Click <**Preview**> button to pre-scan the photo or document.

5. Set the scan area to be scanned, and then click <**Scan**> button.

Note: For more scanning operations, refer to the user manual in the software installation CD.

6. Click the ▮ <**Exit**> button to exit the TWAIN window when the scanning is complete.

7. To save the scanned image, click <**Save**> button in the Image Acquire window to bring up the save window.

8. Type the file name, select the desired directory, and choose a file type. Then click <**Save**> to save the scanned images.
